

TOTAL TRANSACTION COST (TTC) IS A COMPREHENSIVE ASSESSMENT OF THE TRADING AND OPERATIONAL FEES THAT CAN AFFECT PORTFOLIO PERFORMANCE

TOTAL TRANSACTION COST ANALYTICS & REPORTING

Total Transaction Cost (TTC) combines **Abel Noser's** legendary multi-asset TCA platform engine with **Park/Lexington Advisors'** uniquely comprehensive operational cost analytics process to provide the industry's only end-to-end analysis of the total cost of a trade along with associated performance impacts.

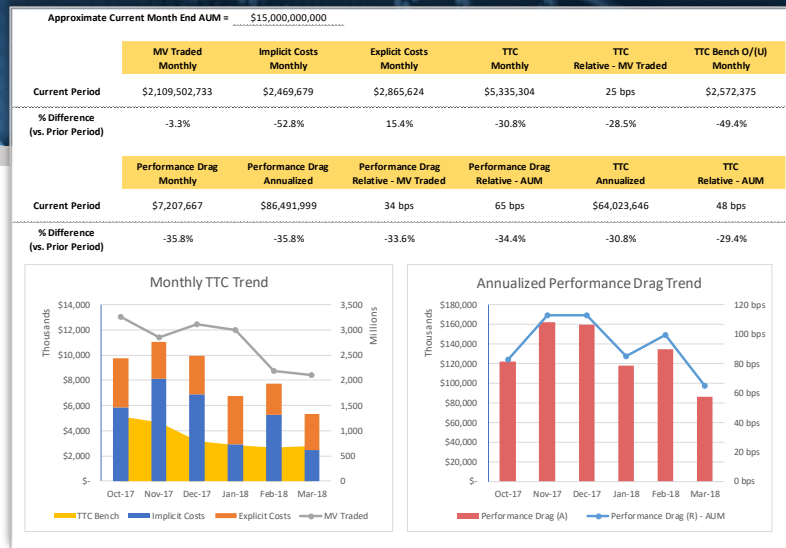

Every trade incurs post-execution costs and fees that remain largely hidden, can significantly dampen performance and are often not reflected in a manager's expressed trading cost proforma. In fact, the total amount of non-trading related fees and expenses can sometimes exceed the implicit trading costs monitored by traditional trade cost measurement.

Advantages

With **TTC**, you'll be provided a full understanding of the costs associated with a manager's investment processes as well as any costs associated with an account's service providers and back-office operations. In other words, **Total Transaction Cost** measurement.

Identify Unnecessary/Excessive Costs that:

- Reduce returns and drag down performance
- Undermine investment decisions
- Cost investment managers and asset owners millions

Our TTC platform lets you:

- Measure all costs associated with a trade
- Benchmark trading and operational costs
- Identify opportunities for reducing costs and improving performance
- Conduct comprehensive oversight on the entire investment management value chain

Key Metrics:

- Performance Drag
- Total Cost Per Trade
- Relative Cost Per Trade
- Total Implicit Cost
- Total Explicit Cost
- Total Cost Per Security
- Total Cost Per Account
- Performance Challenged Trades
- Negative Market Value Trades
- Same-Day Trades
- Allocation Effect
- Custodial Fees
- Client Defined
